VOLATILITY

FEATURE

A **stellar universe** takes you into a game that plays out across a set of **4 grids** with **5 reels** and **3 symbols** each.

The stars are the real protagonist!

The **red** ones give you an **extra spin**, the **blue** ones take you to the **link spin**, the **green** ones collect the **prizes**.

STELLINA WILD

Whenever **2, 3 or 4 red star** symbols appear anywhere on the reel, the symbol expands to cover the entire reel and a **free spin** is activated.

LINK SPIN

When at least **5 link** symbols represented by a **blue star** land on a grid, the link spin phase is activated with **3 free spins**. If a new link symbol appears, the counter will reset to **3**. Each symbol will be assigned a value, which is then added together and **collected** by the **green star**.

If during the **link spin** phase a grid fills with stars, the grid itself will transform into a large reel on which **multipliers** or the **maximum win** will spin. If you get a multiplier, the win collected in the grid will be multiplied by it. **This stage can be triggered randomly by the animated star in the payable.**
